PROPOSED PROGRAMME · ITC KENYA

AI & Data Labeling Training

Summary of planned activities

datamaker

International Trade Centre

2	training programmes: trainers first, then labelers
8	training days, 09:00–14:00 each day
6	hands-on practicals using real project

Meet your Facilitators

01

Sylvester K. Sakitey

Head of Projects

- Project Management
- AI & Digital Technologies
- Strategic Planning
- Operations Management
- Data Labeling & Quality Assurance
- Training & Capacity Development
- Drone Technology (UAVs)

02

Emmanuel Owusu Appiah

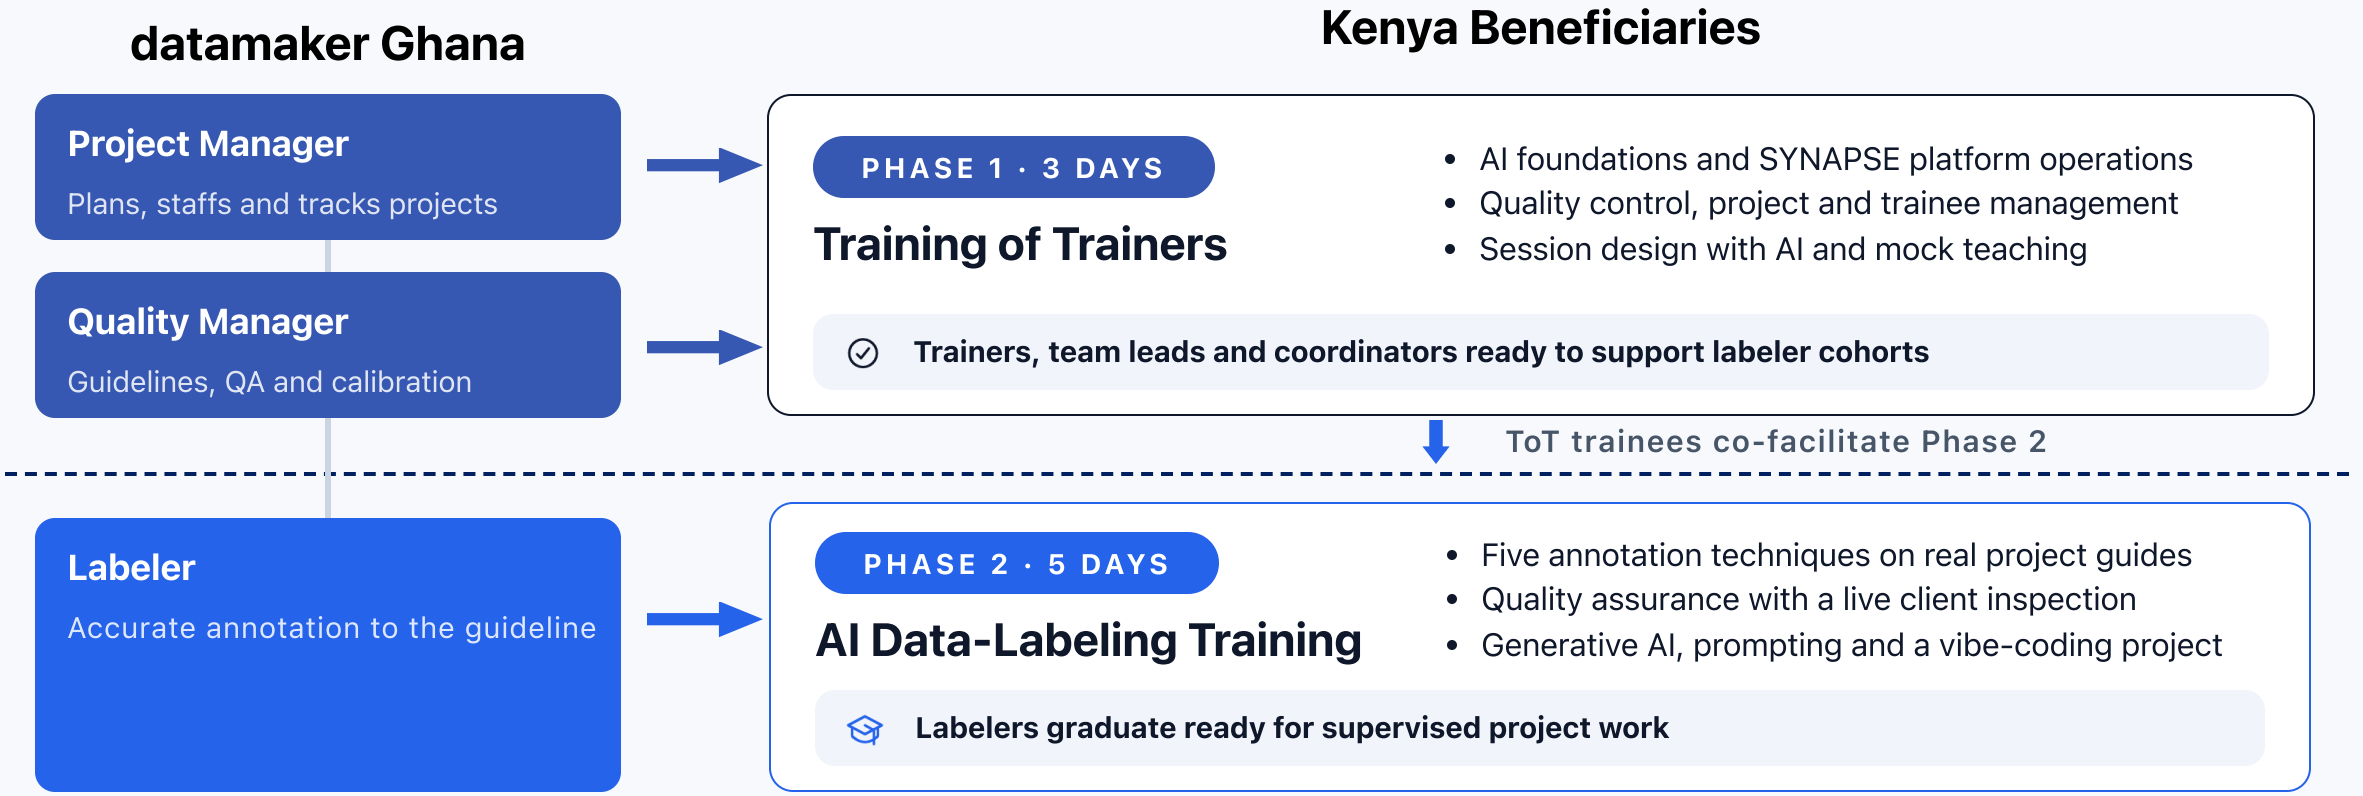

IT & Facilities Manager
Data Protection Supervisor

- Data Protection & Compliance
- IT Infrastructure & Facilities Management
- Training & Capacity Development
- Workforce Development
- Project Management
- Quality Assurance
- AI Data Annotation & Operations

AT A GLANCE

Two Phases, One Career Pipeline

ROLE PATHWAY

WHO DELIVERS WHAT

The Facilitation Team

SS

Sylvester Sakitey

Head of Projects, Datamaker Ghana

Leads most of the ToT: SYNAPSE, quality and project management. Teaches segmentation practice and PCD to labelers.

EOA

Emmanuel Owusu Appiah

IT & Facilities Manager, Datamaker Ghana

Leads Office basics, bounding box and segmentation tools, Generative AI, prompting and vibe coding.

ToT

ToT Trainees

Graduates of Phase 1

Co-facilitate labeler practice, inspections and daily reviews, and gather feedback on Day 5.

GH

GH Training Facilitators

Datamaker Ghana team

Give quality feedback during mock practice and act as clients for the Day 4 live inspection.

A TYPICAL DAY

09:00
Recap and objectives

09:15
Teach and demonstrate

11:00
Guided practice

13:00
Practice and inspection

13:30
Reflection and daily report

KEY ACTIVITIES · 3 DAYS – ToT

From Foundations to Delivering a Lesson

DAY 1
Foundations

- Welcome and DataMaker context
- AI, ML and data-labeling workflows
- Guided SYNAPSE operations and navigation
- Application exercise and knowledge check

OUTPUT
Confident with SYNAPSE and labeling workflows

DAY 2
Quality & Management

- Guidelines and the annotation techniques
- Quality standards, error identification and correction
- Performance monitoring and productivity
- Workflows, trainee management and communications

OUTPUT
Able to run and quality-check a labeling project

DAY 3
Practice & Evaluation

- Introduction to Generative AI
- Design a short training session using AI
- Assessment methods and peer coaching
- Deliver a mock lesson to simulated learners

OUTPUT
Trainer evaluation and a personal action plan

TRAINING OF TRAINERS · ITC KENYA

Three Days at a Glance

Daily 09:00–14:00

TIME	DAY 1 ToT Foundations	DAY 2 Quality & Management	DAY 3 Practice & Evaluation
09:00 to 10:45	Welcome, Datamaker context and AI, machine learning & data-labelling workflows SS	Recap, guideline comprehension and annotation techniques: box, polygon, polyline, segmentation SS	Recap, introduction to Generative AI and designing a short training session with AI SS EOA
	Break · 10:45–11:00		
11:00 to 12:15	SYNAPSE platform operations and guided navigation SS	Quality standards, error correction & productivity monitoring SS	Trainee assessment and feedback methods, mock-teaching prep and peer coaching SS
	Lunch break · 12:15–13:00		
13:00 to 14:00	Practical Exercise, Knowledge Check & Daily Report	Workflows, task and trainee management, communications; case exercise and daily report SS	Participants teach a short labelling lesson; trainer evaluation, action plan and daily report

SS Sylvester Sakitey · EOA Emmanuel Owusu Appiah · SS EOA Both SS and EOA

PROGRAMME OUTCOMES · TRAINING OF TRAINERS

What You Will Be Able To Do

Eight outcomes across three days. Day 1 covers the first three and introduces the fourth.

1. Explain the fundamentals of AI data labeling and its role in developing AI systems.
2. Demonstrate core annotation workflows using the SYNAPSE platform, subject to project configuration and access.
3. Interpret annotation guidelines and explain task requirements to trainees.
4. Apply standard quality-control, error-correction and calibration procedures.
5. Plan and monitor a data-labeling assignment, including staffing, allocation, productivity and deadlines.
6. Maintain project records, production trackers, issue logs and progress reports.
7. Identify risks, escalate unresolved issues and communicate operational changes appropriately.
8. Design and deliver a structured training session and assess trainee competency.

DAY 1 FOCUS

Outcomes 1 to 3, with the first exposure to outcome 8 through the trainer’s role and the paired practical.

KEY ACTIVITIES · 5 DAYS – LABELER TRAINING

One Technique a Day, Then Graduation

DAY 1
Foundations & Bounding Box

- AI and SYNAPSE intro
- Office basics: Word, PowerPoint, Excel
- CCTV bounding-box practice

DAY 2
Polyline & Polygon

- Traffic-flow polylines
- Rail and Catenary polygons
- Inspection and daily review

DAY 3
Segmentation & PCD

- Segmentation tools
- Photobooth project practice and inspection
- Introduction to point clouds

DAY 4
QA & Generative AI

- Feedback and correction
- Live client inspection
- Generative AI and prompt engineering

DAY 5
Applied Project & Graduation

- Vibe-coding project
- Showcase, surveys and testimonials
- Graduation and close

Everyday: ToT trainees and GH facilitators run practice, inspection and the daily review.

KEY ACTIVITIES · 5 DAYS – LABELER TRAINING

Five Days at a Glance

Daily 09:00–14:00

TIME	DAY 1 Foundations & Bounding Box	DAY 2 Polyline & Polygon	DAY 3 Segmentation & PCD	DAY 4 QA & Generative AI	DAY 5 Applied Project & Graduation
09:00 to 10:45	Programme intro, AI & SYNAPSE, MS Office basics SS EOA	Polyline: traffic-flow guide, demo & practice Both	Recap, segmentation tools & Photobooth guide EOA	Recap, feedback & live client inspection SS ToT GH	Vibe coding: website, portfolio or expense tracker EOA
	Break · 10:45–11:00				
11:00 to 12:15	Bounding-box guideline & CCTV Labeling demo EOA	Polygon intro & Rail and Catenary practice	Photobooth demo, practice & inspection SS ToT GH	Introduction to Generative AI EOA	Project showcase, Q&A, testimonials & surveys Both ToT
	Lunch break · 12:15–13:00				
13:00 to 14:00	Practice, quality feedback & daily review ToT	Rail and Catenary inspection & daily review ToT GH	Introduction to PCD (point clouds) SS	Introduction to prompt engineering EOA	Graduation, photos, next steps & close Both

SS Sylvester Sakitey · EOA Emmanuel Owusu Appiah · Both Both SS and EOA · ToT ToT trainees · GH GH Overseas team

KEY ACTIVITIES · 5 DAYS – LABELER TRAINING

Six Practicals on Real Projects

BOUNDING BOX
CCTV footage labeling
Day 1

POLYLINE
Traffic Flow for Autonomous Driving
Day 2

POLYGON
Rail & Catenary Condition Awareness
Day 2

SEGMENTATION
[543] Photobooth Project
Day 3

QUALITY ASSURANCE
Live client inspection of Photobooth work
Day 4

APPLIED AI
Vibe-coded website, portfolio or expense tracker
Day 5

Every practical follows one loop: guideline, demonstration, practice, inspection, feedback.

PROGRAMME OUTCOMES · LABELER TRAINING

What You Will Be Able To Do

Eight outcomes across five days of hands-on AI data-labelling training.

1. Explain what AI data labelling is and why accurate labels matter.
2. Navigate an annotation tool and use MS Office for daily work.
3. Read a project guideline and apply its labelling rules.
4. Label images accurately with basic-level annotations.
5. Complete high-level annotations (Semantic, PCD).
6. Check quality standards and correct errors based on feedback.
7. Use Generative AI tools and write clear, effective prompts.
8. Build and present a simple website or tool using vibe coding.

BY DAY 5

Outcomes 1–6 prepare a job-ready labeler

Outcomes 7–8 add AI skills for wider digital work.

Thank You

AI Data Labeling, Quality Assurance and Project Operations
